

**The JUMBO Has Landed**

# C160 Mobile Jaw Crusher

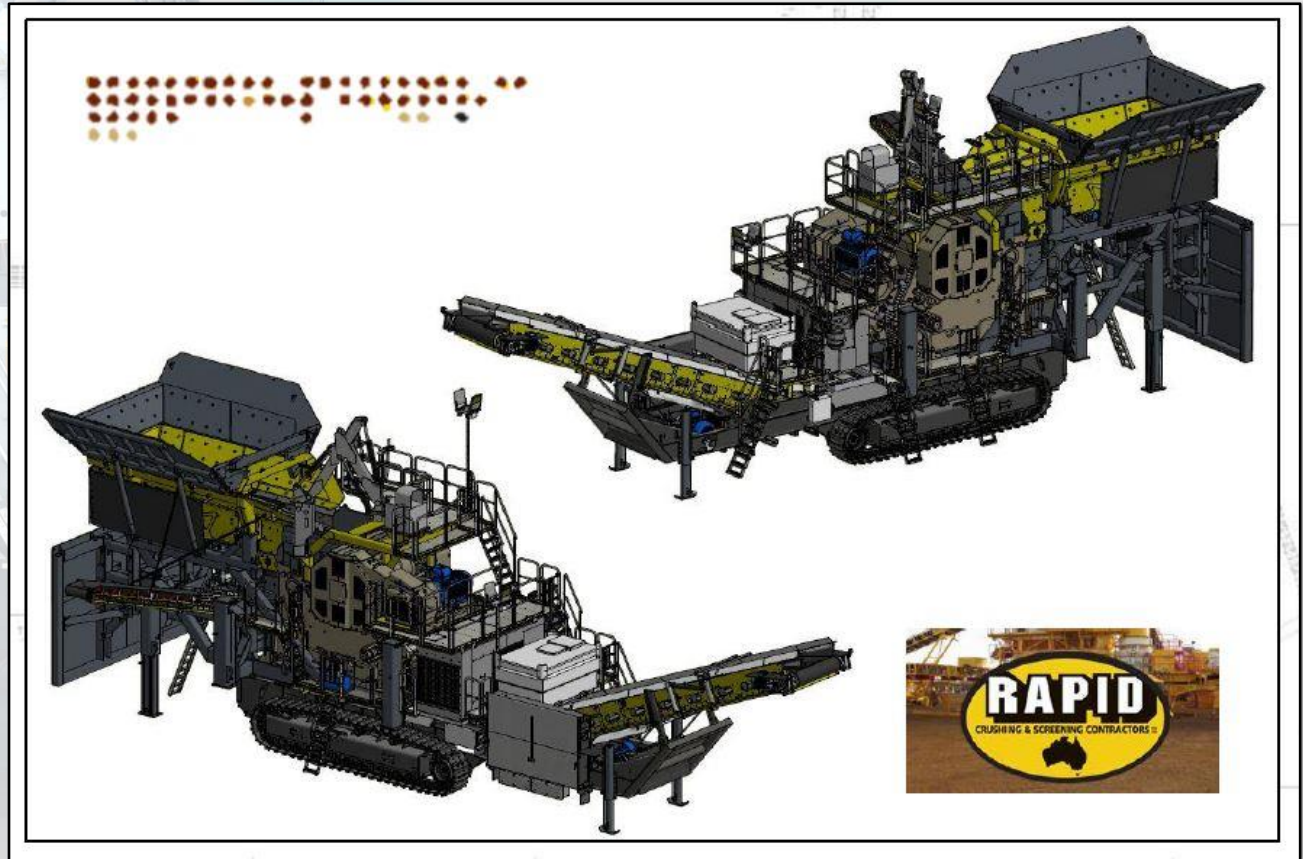

Rapid Crushing and Screening Contractors Pty Ltd has taken delivery of our new mobile tracked jaw crusher that will be a game changer for the industry. This is the largest in the model range and is fitted with the well-known and very reliable Metso Nordberg C160 crushing unit.

## Machine Facts

-  This is the first of this model to arrive in Australia
-  Metso Nordberg C160 Jaw Crusher
-  CAT 455 kVA, Dual Power
-  Feed opening 1600mm x 1200mm
-  Weight as specified over 190,000kg
-  Splits down into two main modules and a few containers and ancillary modules for transport
-  **Rapid are the ONLY private contractor in the world to own one of these units**
-  Backed by Rapid with reliability and support second to none
-  Doing it Right Since 1978...

This machine is still very mobile despite its huge size, with the capacity to keep your mine site production going during shut downs or to compliment any sites crushing campaigns.

Once you see this machine you will be blown away by its enormous size. Rapid have assigned the unit our asset number of E747 and we affectionately call it 'The Jumbo'

## C160 Mobile Jaw Crusher

Transport surprisingly is not too difficult as the machine splits down to fit on two flat deck floats, and two in gauge trailer loads. The portion with the jaw crusher also has the ability to jack itself up so the trailer can simply drive out from under it. Then the tracked section will drive off the second float. All site based assembly can be done in days rather than weeks and with little more than a franna crane.

If you would like to find out more and explore the options to use this machine on your site, call our team today...
